Wedding Announcement.

Mr. and Mrs. John F. Clarke of Stony Plain announce the engagement of their daughter Marie Dale Clarke to Clarence E. Street, son of Mr. and Mrs. W. E. Street of Amisk, Alberta. The wedding will take place the last week in May.

Dr. Russell, Chiropodist.

Owing to the Wednesday half-holiday being now in force in Stony Plain, Dr. Russell wishes to announce that, for the convenience of his patrons, his visiting days in Stony Plain now are Sunday afternoon and Thursday afternoon at Kelly's Hall.

Mr. Kibblewhite Honored.

Among the most advanced scholars at the University of Alberta who will be recommended to the Senate for reception of degree is Mr. Edward James Kibblewhite, of Edmonton, who will receive a Bachelor of Education degree. Mr. Kibblewhite was, at one time, principal at the local high school, and had the reputation of being an excellent instructor, and was popular with his students.

Automobile Sit-Down.

The first sit-down affair in the automobile business which has been reported around here, occurred on Friday last at Mike's Curve, on the Hiway Coanor. Mr. Edward Brike had taken a motor trip up north, where he was engaged in cribbing a well. On the return trip to town he unfortunately tried to come back by motoring around the Big Curve. He had negotiated about half the distance around, when Plunk! his Ford coupe had a sinking feeling and ceased to move. All efforts by the driver to proceed proved unavailing, and the coupe remained there with most of the upperworks showing above the rut.

The Curve had not occasioned any trouble to motorists, up to that afternoon. As one motor driver remarked: "This piece of roadway appeared to be all right until the town's grading outfit came along and 'fixed' it."

Softball League.

A meeting for the purpose of organizing the softball teams was held for Thursday, May 6th, and a few of the players had assembled in the Town Hall. Owing to that being the night for the regular meeting of the Town Council, the ball players moved on. Through the courtesy of Mr. L. M. Larson, the ball players were given the use of the assembly room at the Brick Block, where the players assembled, with a prominent sportsman presiding.

Owing to there being several other attractions in town at the time, the attendance was not so large as had been anticipated, or that the occasion warranted. However, what the assembly lacked in numbers, it made up in enthusiasm, and it was arranged that there be four teams comprise the league, and that practice would commence at once.

Playing will begin when the schedule has been received from the committee.

HARDWICK'S

YOUR HOME TOWN STORE.

Choose Slacks for Freedom!

Sturdily tailored. Buttoned side closing.
Sizes 8, 9, 10, 11, 12. \$1.00 per pair.
Sizes 14, 15, 16, 17, 18, 19, 20. \$1.25.

Serviceable Cotton Bloomers.

Peppy elastic at waist and knees; peach only.
Girls' sizes 22 to 34: Women's: small, medium and large, 25c.

Try a can of instant Postum. If at the end of 30 days you do not feel better, return the can and we will refund the price of the instant Postum, plus the postage. Consumer Service Dept., General Foods Limited, Cobourg, Ontario.

Monster Telescope To Be Erected In California Will Weigh A Million Pounds

Albert Einstein and 100 other scientists watched the last bolt placed in the tube which will carry a 200-inch telescope mirror and they learned the great tube is going to be the world's first "sky cage."

It will not only house the big glass eye that will see 1,000,000,000 light years out into space—but its crew of astronomers will do everything but sleep in the moving tube.

As the tube swings across the sky, astronomers will work in a cage in its upper end, in a basket hanging beneath its bottom and in a big cylindrical room alongside its middle. The telescope and its problems are so vast that for the first time the astronomical observers cannot readily stand outside and look through.

The telescope itself will be in some respect a more wonderful thing than any of the sights yet caught of stars and distant nebulae. The tube, about 75 tons, is a steel framework the bulk of a six-room house, and when its "top" is bolted on will weigh 97 tons and be as tall as a six-story building.

Pressure of a child's hand will be able to swing this giant structure to and fro on its axis when it is finally mounted.

Furthermore the entire telescope when finished will weigh 1,000,000 pounds. Completed and set up on Mt. Palomar, California, the telescope alone will be a steel structure 4 1/2 stories high.

The astronomer riding the top will look directly at rays focused from the 200-inch mirror 55 feet below him in the bottom of the tube. In the middle of the great mirror is a 40-inch wide hole and beneath this will be swung a basket in which other astronomers can ride. They will see the objects in the mirror after reflection back from near the top of the tube, down through the hole in the mirror.

The third crew of astronomical riders will be half-way down the tube, off to one side, where they can see reflections of stars brought from the big mirror by right-angled mirror arrangements.

Plans call for the telescope to be in operation in 1940.

Demand For Wool

Large Amount Now Being Used For Manufacture Of Uniforms

Two important woolen manufacturing officials of Boston said that "a considerable part of the wool supply of the world is being consigned to armament purposes." They placed textiles alongside munitions in Europe's armament race.

An official of the National Association of Wool Manufacturers declared a large part of wool "already in process of manufacture into uniforms. Some of it has not yet reached that stage. If conditions in the world become quieter this wool may be thrown back on the market for lay purposes with a resultant drop in prices."

The price of wool to wool, highest since 1928, can be traced directly, this same official said, to the busy looms of Europe.

The international labor office at Geneva reported to a textile conference in Washington this month that, in Germany and Italy "wool manufacturing is now facing the same scarcity of raw materials as cotton manufacturing. Programs stimulating home production of wool substitutes, and maximum recovery of used wools and waste, have been promoted energetically in both cases."

Just Matter Of Age

A German medical authority has expressed the opinion that persons possessing blue eyes live longer than those with brown. Another doctor agrees with him as to the longer life of the blue-eyed. Medical opinion in this country is, however, cautious in this matter, refusing to generalize, putting forward the theory that eyes grow paler with age, which would make dark eyes relatively less common.

London's last British Industries Fair was the most profitable since 1928.

Well Known In England

His Highness Prince Aga Khan Understands Western World Politics Perhaps the best known of representatives of British India at the Coronation was His Highness the Prince Aga Khan.

Remote descendant of Ali, cousin of the prophet Mahomet, Rt. Hon. Aga Khan is the spiritual leader of the Shia sect, one of the two great branches of the Mohammedan faith. To his influence was largely due the loyalty of the Mohammedans of India during the years when there was so much unrest.

The Aga Khan is astonishingly learned, possessing a knowledge of almost every current European tongue, and a complete understanding of the politics of the races of the West.

He has lived for the most part in England and has made a position for himself there unique among the princes of India. From his own country he enjoys a tributary income of nearly \$2,500,000 a year. His horses are worth at least \$5,000,000 and his vast investments millions more.

In recognition of his great services during the war he was granted the rank of a first-class chief of the Bombay Presidency, with a salute of 11 guns. In 1930 and 1931 he was chairman of the British India delegation to the round table conference in London and in 1932 represented India at the world disarmament conference at Geneva.

Deduction May Be Right

New York Economist Thinks Machine Overrated As A Menace

People who believe that machines will ultimately become a Frankenstein's monster and ruin mankind do not get a grain or so of comfort from the deduction of M. Anderson, New York economist.

For it is, Mr. Anderson's contention that whenever new machines have inspired fears of technological unemployment, this period of apprehension has invariably been followed by an era of improved conditions for workers.

He points to the 1925-27 decline in the number of manufacturing workers, often cited as evidence of technological unemployment. These men were not thrown out of jobs, Mr. Anderson maintains.

The workers, he pointed out, were absorbed by other lines. There had been a great increase in service industries, for instance. Concern for the ethical side of life was reflected in increased production of luxuries, and in a growth of school population, both trends that accounted for many of the workers.

All in all, if you take Mr. Anderson's word for it, the machine is sadly overrated as a menace—Sherbrooke Record.

Mother Goose Rhyme

Ancient Persian Design Depicts Cow Jumping Over The Moon

A 5,000-year-old Persian predecessor of the Mother Goose rhyme, "Hie, hiddle diddle, the cat and the fiddle, the cow jumped over the moon," was described by Dr. Phyllis Ackerman, archaeologist.

A similar incident of animal acrobatics is depicted in Persian designs dating as far back as 3,000 B.C., she told a meeting of the Institute of Persian Art and Archaeology.

"But the early eastern people didn't make patterns like that for fun," she explained. "They made them to encourage their hopes and quell their fears."

In the Persian design, which lacks only the fiddle, the cow hopping over the moon represented the triumph of heavenly forces and meteorological conditions favorable to crops.

"What's wrong about spelling: cat k-a-t?" asks an eastern educator. On the other hand, what's right about it?

This would be a lovely world if men showed as much patience in all things as they do in waiting for a fish to bite.

Creating A Profession

Clearing Mistakes In Movie Call For Technical Advisor

Hunting movie boners, the game thousands of fans love to play, is creating a well-paid profession in Hollywood—the technical advisor.

A flood of critical letters now follows even a slight mistake on the screen. The theme of the writers is "how could he be so dumb?"

To-day inquiry disclosed that the Royal Canadian Mounted Police isn't being filmed any more until an expert looks over the script. Bruce Carruthers, an ex-mountie, just has finished his job for a two-reeler. He spotted two score mistakes.

The first scene for the troop, while on horse, was to salute the flag. "The men do not salute mounted," suggested Carruthers, "they merely sit strictly at attention."

Another sequence called for the sergeant, on meeting a fur-draped girl, to declare, "That silver fox pelt sets you off like a million pounds."

"He should say dollars," the expert corrected. "No woman would like to look so heavy."

His final suggestion was not technically a part of his job. He happened to notice it and threw it in gratis.

A Scottish fur trader, Angus, was admiring a pelt and commented "finest I've seen in 20 years around here, mon."

All wrong, pointed out the expert. If Angus was a Scot and a trader, he would be sure to say, "Oh, I'dime know that it's such a good pelt. I've seen better many times."

Succeeded Second Time

Old Letter Gave English Captain Place At Coronation

Captain Haskett Smith, King's Messenger, and one of the most charming and cultured men one could meet anywhere, tells the romantic circumstances leading to his attendance at the Coronation as Gold Staff Officer. At the time of the preparations for the Coronation of King George V, he was abroad and only returned to England a few weeks previous to Coronation Day. He hastened to send in his application to the Earl Marshal, but in reply received a kind note explaining that it was impossible at that late hour to include any further names among those to be summoned. At the same time he was advised that when he was an older man he should apply for inclusion among the guests at the next Coronation. For 25 years he kept this letter; and this year he sent it to the present Duke of Norfolk, son of the Earl Marshal, to whom he had previously applied. As a result Captain Haskett Smith took his place among the Gold Staff Officers on May 12.

Henry Pitkin, of Hartford, Conn., began the use of duplicating machinery for mass production of watches in 1838, but it was not until 1853 that a Boston watch company produced them in quantity.

Cash And Carry System Is Introduced In Bill To Keep U. S. Neutral In War

Long Speeches

Various Methods Used To Put An End To Unnecessary Harangues

The little incident at a Senate commemoration meeting at the end of which the chairman informed a speaker that he was "going on much too long" may well raise again the question whether a tactful way has ever been discovered. "A saint in the pulpit!" said a gushing woman to Bishop Stubbs after he had been suffering under a very long sermon. "And a martyr in the pew!" groaned Stubbs.

The "good" Lord Shaftesbury, however, most famous of Evangelical chairmen, made no bones about it. Seeing the orator firmly by the coat-tails he would say in widely audible tones, "My dear fellow, are you never going to stop? We shall be here all night."

The House of Commons has had various ways of dealing with prolixity, none of them very tactful. Far back in history we hear that "an old doctor of civil law spoke, but because he spoke too long and too low the House hawked and spat to make him make an end." In 1601 a Sergeant Heale spoke too long and was silenced at last by "hemming." A few years later it was necessary to condemn the practice of hissing. Cock-crowing was a method of a century ago. "Vile! Vile!" is the modern equivalent. —Manchester Guardian.

Visits Moose River

Alfred Seadling Again Sees Scene Of Mine Disaster

Alfred Seadling hobbled out of an automobile to see once again the mining community of Moose River, Nova Scotia, with which his name will always be linked.

Seadling, back at the spot where for 10 days a year ago he was entombed 141 feet underground with Dr. D. E. Robertson, Toronto, and Herman Magill, who died before dragmen released them, arrived in triumph. The townfolk demanded he show them how he could walk. His toes were amputated due to "trench feet" suffered in his long entombment. Seadling obliged and was then placed in a car and driven through the town.

Rules Of The Court

When a bareheaded woman appeared in the witness box at Clanwilliam, South Africa, the magistrate, C. J. Lemmer, reprimanded her. "Consider the hour of the day," said a woman must wear a hat, and he added that no matter what the fashion of the moment might be, a woman must wear a hat in his court.

This Lace Stands the Test of Time

Little stitches into spider grow when it's a crocheted spread you're working on. Here's lace that stands the test of time—just simple six-sided medallions that you crochet individually in string, and join for a stunning "repet" design. Does the thought of owning a dinner cloth of this make your fingers itch to get started? You can make smaller articles, too, using finer cotton. (In string, the medallion's six inches from point to point.) In pattern 6889 you find complete instructions for making the medallion in almost actual size; material requirements. Send 10 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

New legislation to keep the United States neutral in war time and containing a provision that could prevent serious disruption of Canadian-American trade should Canada and Britain be engaged in a war which offered no threat to American neutrality, received quick Congressional approval.

Chief feature of the bill, the "cash and carry" clause, would give the President discretionary power during the next two years to prohibit shipment of any goods to warring nations until title to them has been transferred to the purchasers.

The Senate wanted the plan to go into operation immediately war broke out, but the House wished to lodge some discretion with the President in putting the system into operation. As worked out in conference, the measure would require the President to use the cash and carry system whenever he found that step necessary "to promote the security or preserve the peace of the United States or to protect the lives of commerce of citizens."

Congress agreed to give him discretion in order that trade with Canada, for instance, might not be destroyed unnecessarily in event the Dominion were allied with Britain in a war that offered no threat to United States neutrality.

In addition, the President would be allowed to make any limitation and exceptions he might see fit in respect to "lakes, rivers and inland waters bordering on the United States, and as to transportation on or over lands bordering on the United States."

Adoption by the United States of the so-called "cash and carry neutrality bill" follows closely upon the passage of a Dominion statute which gives the Government even greater powers to control commerce in all materials used in war.

Where the United States legislation will provide that belligerents buying war supplies in that country must pay cash and take delivery at the United States shipping port, the Canadian statute gives the Government power to license the manufacture, transportation and exportation of all forms of materials used in war, including foodstuffs.

These powers would be assumed by the Government in the event of war on a scale that would indicate the necessity of such action. All that would be necessary would be adoption of an order-in-council. Amendments to the Customs Act, passed at the recent session of Parliament, contained the necessary provisions and they occasioned very little opposition.

At the same time the Government is studying ways and means to control, by legislation, the amount of profits that may be permitted to arise from manufacture and traffic in war materials.

Using Substitute Flour

Germany's Move To Overcome Grain Shortage Causing Complaints

Substitute flour used in Germany to overcome the grain shortage has been the subject of complaints throughout the country, the official newspaper Korrespondenz said.

The Nazi party organ insisted that although the substitute was slightly darker in color and not as tasty as real flour, its nourishing qualities more than made up for its shortcomings.

The paper described three kinds of flour available in the reich. The first—Type 502—is high quality flour, which must be used sparingly.

Type 8121, the second kind, is recommended by the newspaper for general use. It added that potato starch and corn starch had been added to this type of flour to make it white.

The third kind of flour—Type 1050—has provoked some concern, "but it is better than its reputation," the paper said.

Upon being created a Knight of the Garter, a man must wear part of the insignia of the order day and night. Most of the knights wear the silver badge of the order during their sleep.

WORLD HAPPENINGS BRIEFLY TOLD

Norman B. Davis, of Ottawa, was elected president of the Canadian ceramic society. In the city division, W. G. Worcester, Saskatoon, Sask., was named a director.

Mme. Consuela Sides, remarried widow of Capt. Charles Nungesser, French war ace lost in an attempt to fly the Atlantic, is taking lessons in aviation at Los Angeles.

Under a pile of dirty rags on which an old beggar, Raymond Grew was found dead in a miserable attic in Paris, police discovered \$15,000 in stocks and bonds.

The Imperial Shipping Committee is surveying the world's shipping and a special staff has indexed practically all the larger ocean-going shipping of the world.

Five New Zealand destroyers, received from the British navy in 1919, are to be scrapped. The destroyers, which belong to the S class, are the Stalwart, Swordman, Success, Tasmania, and Tattler.

If the increase in automobile license sales is a sign of better times, Manitoba seems to be well fixed. The license bureau reported more than 3,000 automobile licenses have been issued than last year at this time.

Kazuki Gomi, a poor barber of Nagano, Japan, who is the same amateur astronomer, received word that Harvard University had awarded him the Pickering gold trophy for discovering a new star during the total solar eclipse last June.

Pilot Lorne R. Van Allen, 23, and Robert Walters, 18, a passenger, were fatally injured when a light Ottawa flying club plane plunged from an altitude of 60 feet into a field near Van Camp, Ont., 35 miles south of Ottawa.

Back To Nature

Disposed Fly And Spider Are Useful To Astronomers

Astronomers still turn to the spider for one of the most necessary accessories of their meridian telescopes. For fine cross hairs, to stretch across the field of the telescope and mark the central line by which the passage of stars is to be gauged, there is nothing to excel a strand from a spider's web.

Even the unpopular housefly may furnish a serviceable part for a research instrument. An astronomer found a fly's wing useful in the construction of a delicate device for measuring the heat of remote stars.—April Coronet.

The sprinkler head was invented by Henry S. Parmelee of Connecticut in 1874. It consisted of a perforated head with a valve which was held closed against water pressure by a heavy spring made of low fusing material.

HOW TO OVERCOME ITCHING PILES

If you are annoyed with itching piles or rectal hemorrhoids, do not neglect the cause or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose, use Dr. Williams' Pink Pills for Pale People. This medicine quickly relieves the itching and soreness, and restores the blood to its normal state. Hemorrhoids is a physician's prescription and is highly recommended. It is easy to use and it cures the cause of the trouble. Advise your physician of this remedy, which is so pleasant to use and so effective.

CAPTIVATING MADE-AT-HOME FROCK YOUR "BEST FRIEND" FOR SUMMER

By Anne Adams

It's certain to be your best "friend" this Summer—the joyous young frock! Surely you can use a versatile model that will "shine" on every occasion, and always be there when you want to look your charming best! Pattern 4372 is a joy for the woman who likes to sew at home. For it's one of the easiest models to cut, fit, and stitch up that ever you've seen. And just see the choice of necklines you have: wear the trim little collar high about your throat, with bodice accented by a row of bright buttons—or fold back your collar and accent the V-neckline with a saucy bow of grosgrain. Sleeves may wear a neat, buttoned, accented band, and you've a beautiful flare to your skirt. Smart in crepe or synthetic!

Pattern 4372 is available in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40. Size 16 takes 3 1/2 yards 38 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

General Lee Was Fair

Spoke Well Of Officer Who Was Unfriendly To Him

Gen. Robert E. Lee was once asked what the thought of a certain young officer whom Jefferson Davis was considering for an important position. Lee gave the officer an excellent recommendation, and the young man was immediately promoted.

"That officer has said some very bitter things about you, General," some of Lee's friends told him, "and we are surprised that you gave him your recommendation."

"I was not asked," said the great-hearted Lee, "for the officer's opinion of me, but my opinion of him."

—Christian Science Monitor.

Sweet potatoes were cultivated in ancient China.

Dominion Drama Festival

Toronto Masquers Win First Place With "The House In The Quiet Glen"

Prize winners in the fifth Dominion drama festival were as follows: Masquers in "The House in the Quiet Glen," by John Coulter, Toronto Irish-Canadian.

Trophy for best performance in English apart from the Beasborough play—The Strolling Players of Vancouver in "The Barrels of Wimpole Street," and the Dramatic Club of the University College Alumnae Association, Toronto, in "The Cradle Song."

Trophy for best performance in French apart from the Beasborough trophy play—Le Caveau of Ottawa in "Francoise."

Sir Barry Jackson trophy for the best performance of a play written by a Canadian—The Toronto Masquers.

Lady Tweedsmuir's prizes for the best individual performances—Gay Scrivener of Vancouver, in "The Barrels of Wimpole Street," and Frank Roastone of Toronto, in "The House in the Quiet Glen."

Prizes given by Raymond Brugere, French minister to Canada, for the best individual performance in French—Florence Castonguay of Ottawa, in the title role of "Francoise," and Joseph Plante of Winnipeg, as the station master in "Le Voyage a Biarritz."

Look Close Calculation

To Get Canadian Pacific Ship Under Golden Gate Bridge

With masts clipped and added ballast in her holds, the Canadian Pacific liner Empress of Britain passed under the now San Francisco Golden Gate bridge.

The flagship of the Canadian Pacific steamship fleet, largest vessel yet to pass under the new span, cleared the arch with about 15 feet to spare. Captain G. M. Furry, Nova Scotia-born commander of the 42,500-ton vessel, explained it took a lot of close calculation to enable his charge to enter the harbor. First it was figured when the lowest tide would be, then nine feet of mast were removed and the ship was loaded with ballast to make her ride deeper in the water. Safety nets strung under the bridge, where work is still in progress, were removed.

The clearance between the bridge and the harbor entrance is 220 feet at mean high water, but at low tide there are several additional feet of clearance.

SELECTED RECIPES

SALMON SALAD

- 1 tablespoon salt
- 1/2 tablespoon mustard
- 1 tablespoon Crown Brand Corn Syrup
- 2 eggs, or 3 egg yolks
- 1/4 cup sweet milk or cream
- 1/4 cup vinegar
- 1 1/2 tablespoons gelatine
- 1/4 cup cold water
- 1 can salmon (1 lb.), flaked

Method: Make salad dressing of first six ingredients. Soften gelatine in cold water; dissolve in hot dressing, stirring constantly. Beat until smooth with Dover beater. Add salmon; turn into greased mould. Chill; unmould on bed of lettuce. Garnish with parsley and hard cooked eggs or olives. Serve with Mazola dressing.

Additions: Peas, hard cooked eggs, diced celery or gherkins.

Revenue From Carelessness

Misdirected Letters Netted U.S. Government About \$250,000

Carelessness of people in addressing their mail meant a profit of approximately \$250,000 to the United States government in 1936.

Commenting on this Burton Cowles, of the Washington dead-letter division, said: "The number of foolish mistakes people make is almost unbelievable." There were 12,250,000 misdirected letters during the past year, he said. Of those, 108,454 cost the government \$220, not counting small change.

The government revenue from all sources of this nature, including sale of unclaimed packages, recovery of unused stamps and fees collected for returning misdirected letters, totalled \$229,353.

SUNDAY SCHOOL LESSON

MAY 16

THE TOLERANCE OF ISAAC

Golden text: Blessed are the peacemakers: for they shall be called sons of God. Matthew 5:9.
Lesson: Genesis 21:1—25:18; 26:1—33.
Devotional reading: Matthew 5:1—12.

Explanations And Comments

The Early Life of Isaac, Genesis 25. All that the Bible records about Isaac individually, apart from incidents in which he is connected with the story of his father Abraham or of his sons, Jacob and Esau, is told in the 25 and 26 chapters of Genesis. In the 25th chapter his marriage to Rebekah and their descendants are recorded. Next we are told of the birth of Esau and Jacob, twin sons of Isaac and Rebekah, the former the favorite of Isaac, and the latter of Rebekah. And then we hear of a famine which drove Isaac to Gerar, in the country which then belonged to Abimelech, king of the Philistines.

Isaac's Prosperity and Its Result, 26:1-17. A hundredfold was the yield which Isaac obtained from his sowing, and so great were his flocks and herds and his household that the Philistines envied him.

The envy of the Philistines led them to fill up the wells which Abraham, Isaac and Abimelech, their king, commanded Isaac to leave. Although Isaac was, as his enemies admitted, stronger than they, he would not strive with them. Without wells he could not support his cattle, and he moved on and pitched his camp in the Valley of Gerar.

Trouble at Gerar, 26:18-21. Isaac dug the wells made by Abraham which the Philistines had stopped up, and called them by the names given them by his father. In digging for a new well in the valley, "a well of springing water" was found. There is an underground stream of water flowing beneath the rock through the valley past Hebron and Gerar and Beersheba. The herdsmen of Gerar contended with Isaac's herdsmen, claiming the water as theirs.

Peace at Last, 26:22. Again Isaac moved on and dug another well. This one he called Rehoboth, Room, for there his enemies contended not; and Isaac said, "For now Jehovah hath made room for us, and we shall be fruitful in the land." We may be sure that the word expressed the feeling that was in his soul, because he had won out by yielding rather than by fighting. It seemed to him a broad and generous land, for he had no enemies for him. A well or two would have been poor comfort to him compared with that sense of satisfaction which he had in winning a great victory by altogether peaceful methods.

The Result of Isaac's Policy of Non-Resistance, 26:31-33. Abimelech sought out Isaac at Beersheba to make a treaty of peace with him, for he said, "We saw certainly that the Lord is with thee." Thus Isaac's patience won the friendship of his enemies.

The planet Jupiter has nine moons, and each one requires a different length of time to make its trip around the planet. Some travel more slowly than others, while their orbits vary greatly in size.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.

—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh...delicious! Para-Sani keeps them from staling.

Get Para-Sani in the handy, sanitary knife-edged carton.

NATIONS AGREE TO CO-OPERATE ON WORLD PROBLEMS

London.—Norman Davis has received final assurances of British and general European co-operation with the United States in solving world economic problems. It was reported here.

Since the United States ambassador-at-large has been in London he talked with leading European statesmen whose pledge of co-operation he is expected to convey to President Roosevelt.

Last doubts as to the validity of these assurances, it is felt here, were dispelled by agreement of 22 countries to sign the international sugar conference agreement designed to stabilize that industry's production and marketing.

Davis called the sugar conference "probably the most successful international deliberation I ever saw," and it is expected to become the model for future economic negotiations. It proved, the ambassador said, that a co-operative conference can be successful.

Would Curb Relief

Sir Edward Beatty Says Strong Action Should Be Taken By Government

Montreal.—Sir Edward Beatty, president of Canadian Pacific Railway Company, told shareholders at the annual meeting that "strong action on the part of all governmental authorities will be required to curb the relief expenditures which are tending to increase despite returning prosperity."

"A solution of the tangled railway problem is still most urgently required," he said. "The serious note of warning with which the Duff commission concluded its report is being ignored. The tremendous waste involved in the operation of duplicate services, which that commission hoped to eliminate, continues."

"A solution which could be adopted to the great advantage of the taxpayers and without injury to employees or railway patrons is widely accepted as logical and desirable. However, it awaits political sponsorship," he declared.

Ontario Surplus

Premier Hepburn Announces Surplus Of \$9,313,938

Toronto.—Premier Mitchell Hepburn, of Ontario, announced a surplus of \$9,313,938 when he issued details of the province's financial statement for the fiscal year ended March 31.

He also announced a "substantial" reduction in passenger auto license fees before next October.

The statement showed net ordinary revenue of \$80,488,439, compared with ordinary expenditures of \$71,174,501. Direct employment relief expenditures totalled \$13,270,097.

In his budget speech, Mr. Hepburn estimated the surplus at \$7,343,000.

Making History

Dominion Troops To Mount Guard At Buckingham Palace

London.—For the first time in history Dominion troops this week will mount guard at Buckingham Palace.

According to these arrangements only Australia will take over the full guard for 24 hours. Guard duties will be: Sunday, Canada, sentries, noon to 6 p.m.; Monday, Australian full guard, 24 hours; Tuesday, New Zealand, noon till 6 p.m.; Thursday, South Africa, noon to 6 p.m.

Bands for the changing of the guard ceremonies will be supplied by the Brigade of Guards. Indian troops probably will mount guard May 18.

Royal Visit To Wales

London.—For their coronation visit to Wales the King and Queen will leave London July 13 and on the following day visit Cardiff and Swansea. On July 15 they will go to Aberystwyth to open the new buildings of the National Library of Wales and in the afternoon to Caernarvon where they will be welcomed by the Rt. Hon. David Lloyd George as castle constable.

More Parole Boards

Urge Establishment Of Separate Board For Each Penitentiary

Vancouver.—Establishment of a separate parole board for each penitentiary in Canada and elimination of military atmosphere surrounding penal institutions were steps urged before the royal commission investigating Canada's penal system which concluded public sessions here.

The steps were proposed by Rev. J. Dinwiddie Hobden, executive secretary of the John Howard Society, an organization which aids in the rehabilitation of prisoners.

The commission, composed of Mr. Justice Joseph A. Archambault, of the superior court of Quebec; R. W. Craig, K.C., of Winnipeg, and J. C. McFur, K.C., of Toronto, will resume its sessions in private at the British Columbia penitentiary at New Westminster, 12 miles east of here. It is expected investigations there will continue for 10 days.

In proposing establishment of a parole board in each penitentiary, Mr. Hobden said where parole is dealt with from Ottawa there is not as close a contact with the problem as there would be with a local board.

Would Investigate Bombing

Spanish Government Asks Britain To Sponsor Movement

London.—The Spanish government asked Great Britain to sponsor a movement for an international investigation into the destruction of the Basque city of Guernica.

In a note presented to Foreign Secretary Eden by Spanish Ambassador Pablo de Azcarate, Valencia suggested Britain head a move to have the bombing of the city investigated by the 27-nation non-intervention committee.

"Basques charge the city was destroyed by an insurgent bombardment carried out by German flyers. The insurgents claim the city was destroyed by retreating Basque troops and Germany has denied the bombing claims."

To Wear Cowboy Hat

Governor-General Will Dress In Regalia Of Western Plains

Ottawa.—When Lord Tweedsmuir attends the Calgary stampede next July he will be dressed in the regalia of a dandy of the western plains.

The governor-general, it was learned, had received a letter from Mayor Andrew Davison of Calgary suggesting he attend the famous cow-country festival in a "ten-gallon" hat, bright bandana "kerchief and the rest of the cowboy outfit. Members of the Government House staff said His Excellency was delighted with the idea and decided at once he would enter into the spirit of the stampede.

QUEEN'S ATTENDANT

Lady Elizabeth Paget

One of those honoured by being selected to carry the train of Queen Elizabeth at her coronation is beautiful Lady Elizabeth Paget, daughter of the Marquis of Anglessey.

Enlarging Italy's Navy

Mussolini Decides To Make Fleet Ocean-Göing Affair

Rome.—Italy, bound to Germany in a new come-what-may alliance through a central European "Rome-Berlin axis", received with joy the word Premier Mussolini had decided to make her fleet an "ocean-going affair."

The press blazoned a speech of Admiral Domenico Cavagnari in chamber of deputies in which plans for the new construction under the 1937-38 budget were disclosed.

To dockyard workers this meant that the two 35,000-ton battleships already on the ways at Genoa on the Mediterranean and at Monfalcone on the Adriatic would be rushed to completion.

Simultaneously dockyards at Naples, Spezia, Ancona, Leghorn and Taranto were hopeful for contracts for at least two new battleships and flotillas of lesser craft.

Breaks Mollison Record

Heston, England.—H. L. Brook, British flyer, set a new flight record from Cape Town to England on landing here. His time was four days and 20 minutes, beating a record set by Amy Mollison of four days, 16 hours and 17 minutes.

Busy Days For Tweedsmuir

Active Program That Will Occupy Vice-Regal Couple Until September

Ottawa.—This week will start a program of activity for the governor-general and Lady Tweedsmuir that will keep them almost constantly on the move till next September 7.

The vice-regal couple will take part in ceremonies here in connection with the coronation in London of King George, and will preside over an official dinner at Government House.

May 15 they will entertain about 3,000 guests at a coronation garden party in the Government House grounds. Three days later they will leave on a short tour through western Ontario, during which they will attend the running of the King's Plate, Canadian racing classic, at Woodbine Park, Toronto, May 22.

For two weeks they will be in residence at the citadel, Quebec, but will leave June 7 for a week's tour of the Maritime provinces, returning to Quebec.

The governor-general will come to Ottawa June 23 to speak before the annual meeting of the Canadian Medical Association, returning to Quebec thereafter.

July 3 Their Excellencies will leave on a long trip through the west and northwest, visiting the Calgary stampede and going down the Mackenzie river to Alkavik. The governor-general will make part of the trip by plane.

He is expected thereafter to go to Tweedsmuir Park, near mouth of Bella Coola river in British Columbia where his countryman, Alexander Mackenzie, reached the waters of the Pacific at the end of his great trek across the continent from Montreal a century and a half ago.

It is expected the vice-regal party will return via Prince Rupert, travelling by train through the famous Totem Pole preserve on the Skeena river.

Weapon Against Smugglers

Royal Canadian Mounted Police To Use Planes

Ottawa.—As a new weapon against run-runners and smugglers on the Atlantic coast, the Royal Canadian Mounted Police is acquiring four De Havilland Dragon Fly cabin biplanes, it was learned here. One, perhaps more, of the planes will be stationed at Shediac, N.B., the others at suitable points in the maritimes. They are equipped with 130-horsepower engines and have a cruising speed of about 200 miles an hour.

For Flood Victims

Toronto, Ont.—Contributions for relief of western Ontario flood victims reached \$150,000 May 6, Red Cross Society officials reported. The society asked for \$250,000.

IMMIGRATION FOR PAST TWO YEARS AT LOWEST POINT

Ottawa.—Immigration to Canada, which at one time reached flood proportions, dwindled to a mere trickle last year when 12,023 people settled in the country. Immigration in the last two years has been the lowest since confederation.

In addition to the 12,023 foreigners who entered Canada, 5,064 Canadians returned to their native land from the United States.

The years immediately before the war were the biggest years in Canada's history for immigration and in 1913 the all-time peak of 400,000 immigrants arrived. In 1920 the arrivals totalled 104,000 and since then have been less than 50,000 each year.

Of the 12,023 new residents, 2,364 came from the United Kingdom and 5,113 from the United States.

Ontario was the destination of 5,149; Quebec, 2,063; British Columbia, 1,373 and Manitoba, 1,007.

Regained Fifth Position

Canada Back In Former Place Among Trading Nations

Ottawa.—Canada regained fifth position among the trading nations of the world in 1936, it was announced by Trade Minister W. D. Euler. With a total trade of \$1,638,000,000, Canada fell in behind Great Britain, United States, Germany and France.

It was nothing new for Canada to stand fifth among world nations that position being occupied from 1926 to 1930 and in 1932. Canada dropped to seventh place in 1931, was eight in 1933 and sixth in 1934 and 1935.

The feature of Canada regaining fifth position was the increase of exports. In export trade in 1936, Canada stood fourth, ahead of France; but in total trade, France went ahead of Canada.

The following is the order of the top 12 countries in total trade: Great Britain, United States, Germany, France, Canada, Japan, Belgium, Netherlands, India, South Africa, Australia and Argentina.

Canada's trade showed a greater recovery during 1936 than was noted generally. Canadian exports totalled \$1,027,902,000 were 22.6 per cent. higher than in 1935 while the total exports of 24 leading trading nations, including Canada, were \$15,235,190,000, an increase of only six per cent.

N.S. Train Wreck

At Least Four Lives Lost When Runaway Coal Cars Crash

Springhill Junction, N.S.—A string of runaway coal cars, hurtling down a 1½-mile grade, plunged into the Canadian National Railway's crack Ocean Limited and took at least four lives.

Twenty-five more persons aboard the eastbound Montreal-Halifax flyer were injured, four seriously, as the pile-up cars rained the passenger express head-on and sent its locomotive and three front cars rolling down a 35-foot embankment.

The dead: Engineer Clarence Bauer, Moncton, N.B.; Express Messenger J. A. Camille Leblanc, Moncton; Alfred Leger, 19, a transient, Macan, N.S.; Ernest Long, 22, transient, Macan.

Bodies of the driver and the two transients—apparently killed as they rode the "blind baggage"—were found after the wreck. Leblanc was missing, but railwaymen were positive he had perished when the express car burst into flame as it careened down the steep bank.

Japan Averts Strike

Toyko.—A threatened nation-wide railway strike was at least temporarily averted by a government promise of wage increases, after 1,000 employees of the railway ministry barricaded themselves at the railway club and declared "war" on the government.

Dies In London

Toronto.—Lady Mackenzie, wife of Sir Alexander Mackenzie, one-time president of the British Traction Company, is dead in London, according to a cable received here. She was formerly Mabel Blake, daughter of the late Hon. S. H. Blake. 2202

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Karlin's to go

The liver should pour out two pounds of bile into your bowels daily. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, rank and the world looks black.

A more bowel movement doesn't always get all the toxins. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmon and gentle, they make the bile flow freely. They do the work of a colon but have no colon or mercury in them. Ask for Carter's Little Liver Pills by name. (Stimulates refuse anything else, \$26)

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER IV—Continued

The next spring William Marshall was 21; and his father set him up in life after the fashion of the times. For livestock, he received with his father's blessing a yoke of young oxen, a heifer, due to calve later, and an elegant pair of small pigs. His farming equipment consisted of a wagon and its contents. There were a few bags of seed spring wheat and oats, some millet and seed potatoes. For tools he had, among other things, a crosscut saw, a rip saw, an auger, two cant hooks, logging chains, a cradle, and a keg of ironmongery supplies. Early in the spring, his brother Maxwell went over with him, and the boys put in the first season's crop on the Marshall place. The cattle found good pickings in an old beaver meadow.

The large fallow of fallen trees was as dry as tinder. The lads made ready for the burning. Brush fire piles were laid in a hundred places and flaming torches of dry cedar passed quickly through the fallow. Within half an hour the entire field was a roaring mass of crackling flames shooting up to the sky in sparkling cones of fire. Great columns of whirling black smoke rose to drift in clouds over the valley for miles around. The heat was intense. Flames lit up the sky throughout the night and for days afterward the fire growled and smoldered in the great hardwood logs as it reduced them to powdery ashes.

Then the dirty work of making land began. The field was an ash pit with stumps sticking up in all directions and was littered over with half-burned logs and charred debris of the fire. The stumps could wait for a more convenient season. Scarred logs and great, crumpled limbs were yanked into fresh piles, with much prodding of the rumps of the oxen, and the brandings were suitably prepared for a fresh burning. Saltys sweat stank on the young lads, who fought amid choking dust for every foot of farm land.

By the middle of May that spring the sower went forth to sow on the Marshall farm. The oxen pulled a triangular drag with wooden teeth in and out amid the stumps, scratching the black, inviting earth. The wheel was sown broadcast; and the drag did what it could to harrow the seed in. The oats and millet were sown next—and the land loved them. It was a slow, laborious task splitting cedar rails and fence-making to keep the cattle off the growing crops. And having done some of it myself, I speak with respect of the heart-breaking, back-hurting job of cradling lodged oats on a stumpy hillside. However, the harvest yielded two tidy stacks of grain; and they stood close to a log stable neatly thatched to keep the cattle and calf as snug as the next winter as bugs in a rug.

In the fall of that year the first log-house was built on the Marshall farm, a one-roomed affair with a ladder to the loft; and it was up that ladder I climbed the first night I slept on the farm. The Marshall boys had wrought hard, early and late, whip-sawing out the rough planks for the floor and the sheathing for the roof. The shingles were cut on the job. Neighbors lent a hand at putting up the cabin. Later in the fall, before his brother left him, William Marshall took a week off and went out to look himself up a wife.

"I've got to scrub out the toilet bowl and how I hate it."
"Better use GILLET'S LYE and flush off the stains."

No need to rub and scrub

Use Gillett's Pure Flake Lye once a week. . . . It takes off yellow stains in a jiffy. . . . keeps clogged drains running freely. . . . banishes unpleasant odors. Use Gillett's Lye in solution* for all kinds of heavy cleaning tasks. It just washes the dirt away. Saves you hours of hard work. Always keep a tin handy.

* Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—The Gillett's Lye Booklet tells how to use this powerful cleanser for dozens of tasks. Send for free copy to Standard Brands Ltd., Fraser Ave. and Liberty St., Toronto, Ont.

WARNING YOUR LAST CHANCE

This is the final Contest in the series of three Royal Household Flour "Name the Picture" Contests! Closing Date: June 12th. Your entry must be post-marked not later than that date. Send your entry now.

ROYAL HOUSEHOLD FLOUR "NAME the PICTURE" CONTEST

This is what you do:

This picture is looking for a name. Suggest a title and read the printed rules and you may win a cash prize. "Imagination might be a good name, or 'No Near And Yet So Far'—send in any name the picture suggests to you. This is the last of a series of three "Name the Picture" Contests. Cash prizes of \$250.00 for the best picture made during all three contests. Enter today.

BE SURE TO TRY
Royal Household Flour
"Royal Household" is the triple-tested, every purpose flour—tested for wheat quality before milling, for flour quality during milling and for baking quality after milling. For bread, cake, pies and pastry.

5 Prizes of \$5.00 each . . . 25.00
75 Prizes of \$2.50 each . . . 187.50
GRAND PRIZE \$250.00

RETAILERS: Each dealer named by winners and the winner of the first prize will receive \$15.00.

ROYAL HOUSEHOLD FLOUR

CHAPTER V.

William Marshall walked across country by way of Woodbridge to the home farm on the 4th line of Markham; and there, nestled by an orchard, a warm welcome was awaiting him.

Poor, simple Willie Marshall! He was not faring forth to court a girl he loved. The mating season of his life was upon him and he was hurrying him out a-hunting a woman to wife. He knew nothing of this peculiar, modern idea that a man is only stirred to courting because of the bewitchery of some woman's charms. Neither, perhaps, did he realize that a youth out wife-hunting is as potter's clay in the hands of the first woman he meets who is also mating-minded.

The mysteries of sex influence are, of course, beyond the depth of a simple, old man, always living single; but somehow, old bachelors and bachelorettes find a good deal of time musing on a subject about which they are supposed to know nothing. And why not? Religion, poetry and art are all saturated with its delightful influences. Heavenly Father, what a waste of driven souls a sexless life would be! The mystery of mating love may have its roots feeding in the earth out of which all life comes, but a flower is unlike the soil out of which it grows. I have observed a dirty-mouthed young scoundrel struck as mute and helpless as any honest minded lad by a slip of a girl with flat breasts and cheeks as white as milk. I have also observed a bold, bad woman, like Kitty O'Shea, fall desperately in love with a plain, pudgy little man, and be as timid and bashful about her love as any innocent, sweet country maid.

Romantic love had little to do with human match-making until a very recent date; and, even to-day, it seems to be, in the main, a home-smashing infection that catches idle men and silly women after they drift into the dangerous age of the forties. Farm has always married farm among the thrifty rural class in Europe—and the lad and the lass are thrown in with the cars. Bonds and mortgages marry mortgages and bonds among the town-dwellers; and the poor have always been lazy and listless in seeking far for their mates. Marrying love is distressingly

mercenary among the Irish on the old sod. Unless she has a couple of Kerry cows for the dowry the emotional Celt demands that his bride be strong in back and legs for the carrying of the creels of turf. And after the songs are sung and the speeches made, something more enduring than love sickness is required to keep a home fire burning brightly in cabin or hall. Love of man and wife is a more sturdy plant. It is a cherishing, unselfish affection that pitiless, is long suffering—and forgiving. "To make a happy household, clime for woman and wife, that's the true pathos and sublime o' human life."

The matter of finding a suitable wife for William became the subject of a lengthy and frank discussion between the young man and his parents. The matter was canvassed most diligently in the evenings, in that drowsy undertone in which folk discuss intimate things in the dark, after the others have gone to bed. Marriages may be made in heaven, but liveable ones usually require the services of kindly matchmakers, who discreetly steer the young man's fancy in a direction where a suitable girl is quietly waiting for the likes of him. Now, setting up house-keeping on a bush farm requires more than the cabin and a bride. There is also the bed and bedding, and the kitchen and other household gear. To make a father-in-law give his daughter on her going-out from home. Local prospects were canvassed carefully, but without the Marshalls getting far in solving William's problem for him. Before he went out to work in service the lad had been too young to be on courting bent. Moreover, he had since been converted; and, after trial, had joined the Methodist Connection. It was at a camp meeting at Hogg's Hollow, in a season of great power and glory, that he had been brought under the awakening of the spirit, and had been made the subject of saving grace.

(To Be Continued)

According to scientists, the thyroid gland in one's throat varies in size in accordance with his age and fluctuates in size according to the season of the year.

Iraq has established a postal savings bank system.

**\$1330.00
IN CASH
PRIZES**

Follow these simple rules:

- 1 Write your title on the coupon (or on a separate sheet of paper) with your name and address and that of your dealer.
- 2 With each title send the words "Royal Household" cut from the Royal Household Flour, or a reasonably facsimile of same.
- 3 You may send as many different titles as you wish, but each must be accompanied by a section of the coupon as outlined in Rule 2.
- 4 This contest will close June 12, 1917. All entries must be post-marked not later than that date.
- 5 Address your suggestions to "Name the Picture" Contest, The Ogilvie Flour Mills Co., Limited, and mail it to the nearest office as listed.
- 6 This contest is restricted to RESIDENTS OF CANADA ONLY. Employees of The Ogilvie Flour Mills Co., Limited and their families are not eligible to compete.

- 7 In case of a tie the prize will be equally divided. The contest judges are composed of 3 disinterested persons in no way connected with The Ogilvie Flour Mills Co., Limited and their decisions will be final. No correspondence can be entered into.

Little Helps For This Week

Blessed be the God and Father of our Lord Jesus Christ who hath blessed us with all spiritual blessings. Ephesians 1:3.

Some murmur, if their sky is clear
And wholly bright to view,
And one small speck of dark
appear.

In their great heaven of blue:
And some with thankful love are
filled,
If but one streak of light
One ray of God's great mercy
glad.

The darkness of their night.

The elements of happiness in this present life no man can command, even if he could command himself, for they depend on the action of many wills, the purity of many hearts. By the highest law of God the holiest man ever born the sins and sorrows of the rest; but over the blessedness of his own spirit circumstances need have no control, for God has given unlimited power to every man to preserve his own happiness although there is in him something higher than that. He can do without happiness, and instead find blessedness.

Manufacturing On Prairies

Manufacturing in the three prairie provinces had an output of \$235,000,000 during 1916 and gave employment to 200,000 persons. Mr. East, chairman of the prairie division of the Canadian Manufacturers' Association, told members at the annual meeting in Saskatoon.

WHAT EVERY WOMAN SHOULD KNOW!

NO need for women or girls to suffer every month from periodic pains, headache or nervousness due to functional disturbances. Dr. Pierce's Favorite Prescription is a very beneficial tonic. This is what Mrs. Ada Dine of 112 First St., Stratford, Ont., said: "I get in random, and I feel that I had to spend a lot of money to get on my feet. I suffered severely from pains in my side and was a physician's case. I began, as a last resort, taking Dr. Pierce's Favorite Prescription. It has done me a great deal of good."

Buy one of your neighborhood druggists. New size, tablets, 50c. Liquid \$1.00 and \$1.50.

Results Talk.

Politics for some reason or another fail to interest the average person much—until they strike home. Premier Aberhart has introduced a particular brand of politics into Alberta that strikes home, especially to those whom he promised to help most, and who most needed it—farmers.

Any Alberta farmer today knows pretty well where he stands as far as his debts are concerned. That is, he knows as much as anybody about it. The fact is, of course, the whole situation is so warped with confusion and political intrigue that the Saskatchewan River after a heavy rain is clear by comparison.

But Saskatchewan farmers are in a happier position. Let's examine the picture in our neighboring province where the government was willing to sit down and talk business with one of the biggest creditors of the West, the mortgage companies.

Take a typical case. Mr. John Q. Farmer. John owed his company \$2500 a year ago, and was paying 8 p. c. on his mortgage, according to the terms of the contract which he had signed when times were good. What is John's position today?

Just this—instead of paying \$200 per year, and having eventually to meet the payment of his principal of \$2500, John this Fall (1937) will pay only \$128.04 interest. And his principal has been reduced to \$2134, down \$466, which he is paying 5 p. c. per year.

And he isn't laying awake nights wondering if the courts will change the whole thing! either. He has a new mortgage which is legal, signed by his company and himself, and it calls for 6 p. c. interest instead of 8, and the reduced interest is written into it. In fact, the old mortgage for \$2500 at 8 per cent is torn up and probably in ashes somewhere.

John isn't in the dry belt, either. He's an average Saskatchewan farmer. His brother in the dry area has a much different story to tell. He got a much more drastic reduction, because he deserved it!

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Searle Grain Co. Ltd.

Since the dawn of agriculture, the dreaded black rust, like a giant scythe, has, from time to time, remorselessly cut down the farmers' fields of wheat.

In 1935, after several years of distressing drought, Manitoba and Saskatchewan had the promise, at last, of a bumper crop. Thirty, 40 and 50 bu. to the acre were the words on everybody's lips. Alas! the rust crept in and the fine promise of a bountiful crop became a mockery. The horn of plenty was ruthlessly snatched from the very grasp of the expectant farmer.

Mr H Littlejord of Arnaud, Man., however, had a crop of good red Spring wheat that matured unharmed by the rust. It was Thatcher, a new rust-resistant variety, under development since 1907 by the Minnesota Agricultural Experimental Station. The Manitoba government purchased Mr Littlejord's crop and distributed the seed, as far as it would go, to Manitoba farmers.

There was, however, none available for Saskatchewan. So, with the encouragement of the Dominion Dept. of Agriculture, the "Crop Testing Plan" imported from Minnesota all the highest quality Registered Thatcher available from their best seed growers. Nine carloads were brought in and distributed at cost to some two thousand farmers in Saskatchewan and Manitoba.

"NOW Body by Fisher"

**MEANS TWICE
AS MUCH**

The world's
smartest, safest,
most famous car body
... Only on
Chevrolet in the
Lowest Price
Field!

Twice the beauty . . . with glorified "Body by Fisher" style. Smart and distinguished, from new "diamond" radiator grille to the capacious built-in trunk at rear.

Twice the safety . . . with Unisteel construction throughout—steel sides, steel floor, steel cowl, steel Turret Top—and Safety Glass in every window. Twice the comfort . . . with wider seats, flat floors, improved visibility, new spacious room all ways, full insulation against heat and cold, and Fisher No-Draft Ventilation, of course.

Only Chevrolet has "Bodies by Fisher" in the lowest price field. And no other car priced so low gives you all these other matchless advantages: Valve-in-Head Economy engine . . . Knee-Action sliding ride (in Master De Luxe Models) . . . and Perfected Hydraulic Brakes. You get the most for your money when you choose a Chevrolet. Ask us about the low monthly payments on the General Motors Instalment Plan.

\$745

Master 2-passenger Business Coupe delivered at factory, C.I.B.M. Government taxes, license and freight additional. (Prices subject to change without notice.)

Summerfield & Mayer, Stony Plain.

New Office Opened.

One of the finest offices in the West in connection with a town garage has just been occupied by Summerfield & Mayer. The building to the north of the Garage, until recently used as an implement salesroom, has been refurnished in a very complete manner. There is space now for several cars to be on display, and behind the fifty-foot counter there are up-to-date filing cabinets, and modern compartments for the numerous automobile parts and car accessories. Summerfield & Mayer are local agents for Chevrolet and Oldsmobile cars and General Motors Products, and invite you to call and inspect their new premises.

C. N. Train Service.

Trains from the East arrive here on Sunday, Tues., Thurs., at 1:32 p.m.
Trains from the West arrive here Sunday, Wednesday and Friday at 6:23 p.m.

"We Poor Henpecked Husbands."

The women of this district don't realise what wonderful husbands they have. Every time they hold their meetings hubbly has to stay home with the children. When they go and sew on their quilt and have their lunch, we poor henpecked husbands have to stay and keep the home fires burning.

Now, I believe it's up to us. Men of the North to get together with the children and discuss feedings and anything pertaining to child welfare, so that when the next generation grows up they will be able to tell their wives where to get off at. If we don't watch out, the first thing we know we will have to get up and light the fires when those cold mornings come around again.—Godwin News, in Northern Tribune.
